Louis : I want to introduce you the most fantastic sport : Snowkite !
The Snowkite is the kit-surf in mountains : you ski and you fly !
You can use skis or a snowboard, with a little sail. In this incredible sport, you can browse more than one hundred km and reach a speed higher than seventy km/h.
This sport involves a very good physical condition, a very good knowledge of wind, mountain, and meterology.
I think that what is fantastic in this sport is the freedom you have to go everywhere flying with your sail, to inaccessible peaks, and flying from peak to peak. And more it's a really incredible experience of communion with nature, as if you were a bird.
